

Mathematical Monthly Volume 3

Filesize: 3.42 MB

Reviews

If you need to adding benefit, a must buy book. It really is writter in straightforward words and phrases rather than difficult to understand. Your life period is going to be change the instant you total reading this ebook.

(Letha Okuneva)

MATHEMATICAL MONTHLY VOLUME 3

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1861 edition. Excerpt: . $8 = -54.29178436$, and $= 44.18152073$, the operation will appear as follows: $---4.2455\ 74430+$, root. The root thus obtained will always be correct to as many places as are found in any term in the column of dividends. Geometrical Method. The formulas for these operations may be deduced geometrically, by a process very similar to that required for the corresponding rule for cube root. For this purpose, let the following problem be proposed: --Required the dimensions of a rectangular parallelopipedon whose breadth and length exceed its height by d and d respectively, and whose solidity is g . Let y = the height; then $y-d$ = the breadth, and $y+d$ = the length. Multiplying together the three dimensions, we have (1) $y + (d + d)f + dd y = q$. Put $s=d+d$, and $p = d^2$; then (2) $y^3 + sy^2 + py = q$, the general form employed in the foregoing pages. We will suppose the required root of this equation to be irrational, and let m = the initial figure. Since the entire root is to be the height of a right prism whose several dimensions are as given in the problem, we will form a right prism (Fig. 1), having $AB = m$, the height; $AC = m-d$, the breadth; and $AD = m+d$, the length. The solidity of the prism is $m(m-d)(m+d) = m^3 - d^2 m = m^3 - j - sm - pm = 8$. Subtracting the solid contents of the prism from that...
